

Instruction for labeling:

1: CTRL+R: Select location where your files will be saved (annotated files).

2: Select “Open DIR”: It will pop up browsing window. In this you have to select the directory in which you have the images.

Now Start Labeling:

For each Image:

A) For Car:

- Select CreateRectBox.
- Draw a bounding box around the car.
- Select “CarBox” by double clicking from the label list.

B) For Number plate:

There are 3 cases:

1: Clear Number plate:

- Select CreateRectBox.
- Draw a bounding box around the plate.
- Write Number plate Text in the box and Select ok. (Eg: AX-985)

2: Number plate not visible:

- Select CreateRectBox.
- Draw a bounding box any where randomly.
- Select “-1” by double clicking from the label list.

3: Number plate visible but not readable:

- Select CreateRectBox.
- Draw a bounding box around the plate.
- Select “0” by double clicking from the label list.

Press CTRL+S for saving.

Press 'N' for the next image. (You can use P if you have missed any image by chance).
